

RIEBLI MUTUAL WATER COMPANY

Notice of Water Services Provided

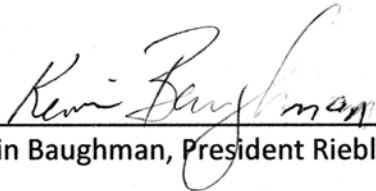

This letter serves as verification that the Riebli Mutual Water Company (RMWC) incorporated in the State of California as a 501 c(12) non-profit corporation and designated as a Community Water System operating under permit CA4900603 shall be the primary supplier of potable water for domestic use to the 47 properties known as Hidden Hills as listed in appendix A, and shown schematically on the map in appendix B.

The water delivery capabilities of the Riebli Mutual Water Company are in compliance with local, state, and federal regulations. The water is tested and analyzed by a local certified laboratory and has been found to be a suitable source of sanitary potable water for domestic use which meets or exceeds all regulatory guidelines as reflected in the annual Consumer Confidence Report and State Division of Drinking Water records.

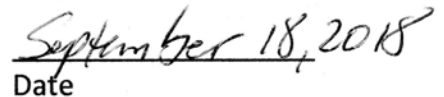

The system is comprised of two wells which deliver a combined average capacity of 120 gallons per minute, a main storage tank which provides a nominal capacity of 57,000 gallons is scheduled to be on-line by Fall of 2018. Pending completion of the new tank, water service is provided by the two existing wells and a temporary 5,000 gallon tank. Water is distributed throughout the system by 6" main lines. Water service connection laterals to each property are a single nominal 1" diameter pipe located within the water system utility right-of-way at each parcel.

The system provides fire reserve capacity via 6 fire hydrants located at strategic locations throughout the Hidden Hills subdivision. The fire reserve and delivery capacity of the system has been found to be acceptable to the County Fire Marshall. Actual pressure at each property should be verified by the home owner. Some homes at the highest elevations may need to provide booster pumps to obtain the pressure required for a residential fire suppression system.

Water service will be established to each property via a single service point after the installation of a water service meter and backflow preventer that meet the current standards and specifications consistent with State, County, and RMWC guidelines and policies and that all equipment has been installed and tested by an individual who holds the proper license and/or certification from the State of California. Results of initial and periodic tests must be provided to an authorized agent of RMWC. RMWC shall continue to provide water service to each residence so long as all fees, charges and assessments are satisfied, and the utilization of water services complies with current State, County and RMWC requirements and guidelines.

Kevin Baughman, President Riebli Mutual Water Company
